DIDSBURY, ALBERTA, THURSDAY, JULY 17th, 1941

\$2.00 per Year. 5 Cents a Copy

Board of Trade Supper Meeting This Evening

F. Foulde, district supervisor for the Dominion Department of Agriculture, will speak at a supper meeting of the Didsbury and District Board of Trade which will be held at the Knox United Church this (Thursday) evening at 7 p.m.

The speaker will take for his subject "Youth Leadership in a Rural Community," using the word "rural" as it is now being used in the States to refer to a community around a town or small city, because of its combination of rural and urban, may be classed as "Rural."

Fined For Overplanting

Overplanting of wheat acreage is being severely punished in United States, the fine being 49c a bushel for wheat sown on ground not allotted for that specific purpose. Many farmers are irate over the size of the penalty and say that the general understanding was that it was to be only 15c a bushel.

BIRTHS

at Didsbury General Hospital

- July 3rd: to Mr. and Mrs. Ben Dyck, a boy.

Didsbury Ladies' Shoppe Closing-Out Sale

Starts Saturday, July 19

and will continue until everything is disposed of.

SEE LARGE SALE POSTERS

As we are closing out the business we appreciate having all outstanding accounts settled at once.

Fair and Sports Next Wednesday

Preparations are now well under way for the 36th Annual Didsbury Fair and Sports which will be held next Wednesday, July 23rd.

Besides the usual exhibits of live stock, Agriculture, home products, and fancy work, the Didsbury Dairy Calf Club will hold their annual Exhibition and Calf Judging Competition.

As usual the judges for livestock will be supplied by the Department of Agriculture, and this year the home products and ladies work will also be supplied by the Department.

The secretary states that present indications show that the number of entries for the Exhibition will exceed that of last year. There is no entry fee charged for exhibits and entries close at 10 p.m. on Saturday evening July 19th.

A full afternoon of sports have been arranged. The Races include a trot or pace of 3 heats, each heat a race, for a purse of \$100.00; mile open run for a purse of \$25.00; and a classified race, 5-8 mile best two out of three heats for a purse of \$25. There will also be shieland pony races. A Softball Tournament is expected to draw entries from 8 or 10 teams with purses \$20, \$10 and \$5. There will also be a good program of races for the kiddies.

The refreshment booth on the grounds will be in charge of the Red Cross.

In the evening a senior baseball game is being arranged on the ball diamond east of the track after which there will be a dance in the theatre under the auspices of the Calf Club.

HEAT PAYS

"It sure does," said the old Dronth as he bellied up to the orange box "and she sweats too."

"Two cents for a cold glass of Lemonade!" shouted the kid behind the box. "Two cents for a cool off. Two cents to help the Red Cross help our bombed out buddies over there—make it four cents Mister."

"What about my kid? what was he paid out?" said the old Dronth.

"Aw shucks," said the kid behind the box, "hail only kid's chicken and gophers but bombs Mister—they kill buddies."

"OK," said the Dronth, "make it a double header, kid."

Did you see "Our Gang Lemonade Stand" on main street Tuesday? It was hot, it was wet, but it was good.

Promoters: Lyndel Goehoe and Douglas Durant

Helpers: George Goosen, Stanley Devolin, David Lamont and others

There was a mother in the background, but, aw shucks, mothers are always there so no names mentioned.

Result at time of going to press—\$1.74. The Red Cross says thanks a million.

Don't forget folks—the older boys will operate a Red Cross booth at the fair. They invite your patronage and help.

For best values in Men's Shoes—buy at Scott's

NOTICE

Forms for the completion of application under the Wheat Acreage Reduction Plan are now on hand at both the municipal offices of Westerdale M.D. and Mountain View M.D.

These forms must be completed and returned before any payment on the Wheat Bonus can be made.

A. Brusso
A. McNaughton.

Rosebud Health Unit Quarterly Meeting

The quarterly meeting of the Rosebud Health Unit was held on Monday at Didsbury with Mayor Dunkley of Olds in the chair.

The members of the board present were Messrs. B. C. Trimble of Mountain View, Geo. Haug, Beaver Dam; A. S. Gough, Rosebud; Mayor Dunkley, Olds; M. F. Foster, Carstairs; and J. E. Gooder, Didsbury. Dr. Guggan of the Department of Health was also present.

Dr. Guggan read the quarterly financial report and Dr. McPherson, the Medical Health Officer, gave a report of the work done during the quarter. Both Reports were adopted.

The question of arranging for clinics for school children needing tonsil operations was further discussed. Dr. McPherson reported that the local medical practitioners were in sympathy with the scheme and the doctor was instructed to approach the local hospital to see what arrangements could be made regarding the clinics.

The medical officer's report brought out the fact that goitre was very prevalent in the district. Dr. Guggan pointed out that goitre could be counteracted by administering iodine tablets to the school children. It was decided to bring the matter before the board of the Olds School Division and the different town school boards in the unit and request that they take over the administration of iodine tablets to all school children.

A letter was read from the Foothills Health Unit asking if the Rosebud Unit were agreeable to the increase of Mr. Moonex's salary. Mr. Moonex, sanitary inspector divides his time between the two units. The secretary was instructed to write the foothills unit that they were in favor of increasing his salary to \$140 a month.

Dr. McPherson reported that a moving picture projector had been purchased for use in the schools and other meetings. He was given authorization to purchase 2 educational films.

Golf Notes

Any members who haven't yet turned in their score card for the handicap, please do so at once as we wish to get the handicap competition underway now that Bob has got the fairways cut. Mr. Brusso and Mr. Fisher are the handicap committee.

Didsbury Jerseys Stand High at Calgary

The Jersey Cattle raised and owned by Didsbury Jersey Farm made a good showing at the Calgary Exhibition last week, some animals taking top honors.

The Senior Championships for Bulls 2 years and over "Didsbury's Raleigh Noble" owned by W. Hughes of Calgary, and the Senior Reserve Championship was won by "Didsbury's Prince Royal" owned by N. S. Clarke and Sons.

The same animals took the Grand Championship and the Grand Reserve Championship.

N. S. Clarke and Sons also took 3rd place with "Didsbury's Gem Model" in the junior bull yearling class; 2nd place in the Senior Get of Sire, 3 animals not under 2 years of age; 1st place in Progeny of Dam, 2 animals; and 3rd place in Junior or Breeders Herd.

Obituary.

Mrs. ALLEN HUSPERGER

Another of the earliest settlers of this district passed away on Monday July 14 when Mrs. Allen Hunsperger died at the Holy Cross Hospital, Calgary, at the age of 67 years, 3 months and 14 days.

Born near New Dundee, Ont., March 30th, 1874, Judith Elma Cressman came with her parents to Didsbury 42 years ago. She was married at Carstairs on January 29, 1901, to Mr. Allen Hunsperger and they have since resided on the farm south-west of Didsbury.

Coming here in the early pioneer days, Mrs. Hunsperger has done her full share in the development of the district from the raw prairie to a prosperous farming district in which time she gained many friends through out the community who sincerely regret her passing.

She is survived by 2 daughters, Grace at home and Enith of Edmonton; one son Lynn and an adopted son Milford, both at home. She was predeceased by a daughter, who died in Feb. 1911 at the age of seven years.

She also leaves to mourn her loss three sisters, Mrs. Geo. Ryckman of Bellingham, Wash.; Mrs. Ray Curdy of Spokane, Wash.; and Miss Z. Cressman of Didsbury; and five brothers, Morgan Cressman of Didsbury; Bruce Cressman of Raven, Alta.; Eliud Cressman of Hillcrest, Alberta; Bert Cressman of Michel, B.C.; and Mollo Cressman of Staveley, Alberta.

The funeral services will be held this (Thursday) afternoon at 2.30 p.m. in the M.B.C. Church. Rev. C. J. Hallman and Rev. Earl Archer will officiate at the services.

U.F.A. Convention

The Didsbury Constituency U.F.A. and U.F.W.A. annual convention will be held on Tuesday, July 22nd, at the Lone Pine Community Hall.

The members are asked to gather at noon and bring picnic lunch baskets. The feature of the afternoon will be addresses by H. L. Fowler, president, and Norman Priestley of Calgary, manager of U.F.A. Central Co-operative Association on the newly formed Canadian Co-operative Implement Limited.

15th Light Horse Go to Scree Camp

The local detachment of the 15th Light Horse (Armoured Car) left early on Sunday morning for Scree Camp where they will put in 2 weeks training.

Owing to the enlistment of many of the members in the Active Service Forces, the detachment is now under strength and only 20 members were able to go to camp.

Sgt. Major J. Garner was in charge of the local detachment.

WEDDINGS

KRUEGER—GREER

A quiet wedding was solemnized amid friends and relatives at noon on Thursday, July 10. The wedding took place under an archway of flowers on the lawn of Mrs. O. A. Krueger, when Miss Erma Berdeam Greer of High Prairie Alberta became the bride of Mr. Fredrick Albert Krueger, son of Mrs. and the late Mr. O. A. Krueger of Enilda, Alberta. Rev. A. M. Amacher officiating.

The Bride wore a blue-green frock with white accessories and carried a large bouquet of pink and white peonies. Erna Fisher, who attended the bride wore a pale green frock with white accessories and also carried pink and white peonies. The mother of the groom wore a brown flowered dress with a corsage of sweat peas. Mr. Lloyd Fisher attended the groom.

After the ceremony a delicious lunch was served on the lawn by Mrs. Henry Fisher and Mrs. Bryan Johnson, sisters of the groom. Each guest had the pleasure of eating a thirty-five year old crabapple, which were canned by Mrs. Krueger the same year the groom was born. They were reported delicious.

After lunch the bride was presented with many lovely gifts.

On Friday the couple left for Banff and will return home by the way of Banff Jasper Highway.

United Church Notes.

Even in hot weather you need the help that comes from joining with the children of God, as they worship and Praise Him in His house. We believe it will be true of you as it was with them of old when it was said, "Come with us and we will no thee good."

The minister will speak at all services next Sunday on "The Omnipotence of God and its Value to us." You will receive a hearty welcome at these services.

For the next four Sundays there will be no session of the Knox United Sunday School.

WHEAT BOARD REGULATIONS

According to the Wheat Board regulations farmers on taking out delivery permits must state their delivery point. They will then be required to deliver all their wheat to that point. They are not compelled to deliver to any one elevator at point. Any farmer can start delivering at one elevator and then change to another later on, but it must be at the same point. The delivery point cannot be changed.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Edward Blunt, 64, prominent member of the Indian civil service and author of important works on Indian affairs, is dead.

Joseph P. Howe, 62, foreman of the coinage department at the Royal Mint and member of a well-known Ottawa family, died at his home at Portland, Ont.

Within 30 minutes after meeting, U.S. congress approved and sent to the White House the \$1,195,925,780 labor-federal security appropriation bill for 1942.

A great "canyon," ranging in depth from 500 to about 8,400 feet, has been charted on the floor of the Atlantic a short distance southeast of New York.

The ministry of agriculture announced potato factories for production of flour and meal for livestock will be established in Northern Ireland.

The London Daily Herald, Labor newspaper, which described itself as an "implacable foe" of Lord Beaverbrook politically, welcomed his appointment as minister of supply.

The International Red Cross of Geneva has completed arrangements for regular replacements of clothing for British prisoners of war in enemy countries.

Found in a ditch in England where it lay for 17 days pronounced harmless by soldiers and others, a bomb exploded in the hands of a policeman who was killed. Several other persons were injured.

With evidence a London bank charged £4 (\$17.80) a half-year for keeping a lieutenant's account, the president of the court-martial declared it was "exorbitant". Two charges of overdrawing were dismissed and another held over.

Used By Pioneers

Camels Did Work Of Horses In B.C. 100 Years Ago

It may surprise a great many people to know that about a hundred years ago or a little more, there were many camels in British Columbia, which were used by the pioneer settlers, horses being scarce and dear at that time. Where they came from, who brought them, or why, we do not know, but a historian of that period relates that a farmer's horse unexpectedly, seeing a camel for the first time, took fright, leaped over a cliff and was killed.

Lake Baikal, Siberia, is roughly twice as deep as any other lake in the world which has been sounded.

Back On Duty

Thrilling Story Of Pilot's Crash And Escape From Crete

Flt.-Lt. D. S. G. Honor, who was shot down into the sea off Crete, lost for six days on the enemy-occupied island and saved by a big Sunderland flying boat which spotted his flashlight signal is back on duty in Egypt with his Royal Air Force Hurricane squadron.

Honor, awarded a bar to his Distinguished Flying Cross for the Crete exploit which followed the destruction of two Axis aircraft over Maleme airport, told the story when he reached Cairo with a sergeant-pilot of his own flight who was also shot down and who escaped with him.

The flier was attacking Maleme airport and had intercepted and shot down one Junkers 52 and one S79 when he himself was attacked from below.

"With my elevator and aerial control gone, I took what evasive action I could," the Air Ministry News Service quoted him as saying. "Then a Messerschmitt 109 attacked me close to the cliffs of the bay. To stop attacks from astern, I planed down and hit the water with the aircraft hood closed.

"I went down with the machine 50 feet into the sea without even a window open. Somehow I got out and my 'Mac West' brought me to the surface.

"For fully four hours, I tried to get ashore and it took me an hour to do the last 20 yards. I was in despair of ever making it, but eventually drifted to a cave and climbed astride a stalagmite like a hobby horse.

"I spent the night in that freezing cave. They were the worst hours of my life. After daylight I swam my way to a little headland dried out my clothes in the sun and footed it until I reached a goatherd's empty hut."

"After much more tramping," he continued, "I came upon a little patchwork of green and gold fields with a small white house, a sight for sore eyes. It took me four hours to reach the village. Boy who came to greet me left me at a church where the padre gave me water, goats' milk, cheese and rye bread.

"Here I was told that another British pilot had been shot down that day. Almost unbelievably it turned out to be a sergeant-pilot of my own flight.

"Then there was a friendly discussion whether the villagers should turn me over to the enemy as we were completely hemmed in. I asked for four hours to think it over, realizing that from their point of view it would be better to surrender us, as the poor devils had already had six of their villagers shot by the Germans for supposedly withholding information.

"So we started our journey through the German lines.

"No drama can be made of our crossing of the island although it was German-occupied in parts, but drama did occur. After a meal of egg and chips given us by French-speaking peasants, night came on and we saw ME109's ground-strafing a nearby air-drome.

"When we heard an aircraft approaching the island we thought it was German until I saw the shape of a Sunderland. We started signaling with pocket torches and I sent out messages in excellent Morse. If I may say so, and was picked up. Actually, my 'R.A.F. Here, R.A.F. Here' in torchlight saved me although it was a million-to-one chance, in the Sunderland pilot's words. The Sunderland's crew had to inflate their dinghy to take us aboard."

Using Special Bulbs

New Device Permits Taking Of Night Pictures Without Flash

Unique records are being made of incidents in the air war on Britain, thanks to a device perfected by British inventors. Even at midnight it is now possible, without the use of flash, to take photographs as sharp-cut as any on a sunny day. It is done by using, instead of the usual flash-bulbs, special bulbs screened with infra-red filter coatings which turn the dazzling magnesium flash into a dim red momentary glow, invisible from the air.

There are about 1,500 kinds of birds in North America, north of Mexico.

A TAILORED BUTTONED DRESS

By Anne Adams

This button-front cotton is lifted right out of the "housekeeping" class by its trim tailoring and well-designed details. You'll find Pattern 4777 by Anne Adams useful the day-long—wear it at home, shopping or visiting. It's one of the most slenderizing frocks you've ever owned, with lovely longwaisted lines given by those side-bodice sections that gracefully curve around to the back. A convenient full-length front buttoning, double from skirt panels—and a long panel down the back are all wonderful figure-flattering features. You'll like the young air of the notched collar which may be in self-fabric, as shown, or in fresh contrast. Here's a real "find" that you will wear the calendar around—do make it right away!

Pattern 4777 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4½ yards 35 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

Of course we are always wishing for what we haven't got. What else is there one can wish for?

It should be kept in mind that science is essentially nothing more than systematized curiosity.

Not All For Munitions

Canada's War Loan Covers Many Other Needs For Army

Canada spent an estimated \$700,000 for medical and dental equipment and supplies for fighting services in May, Munitions Minister Howe said in a recent statement.

The entire cash proceeds of the \$600,000,000 Victory Loan will go toward war expenditures, but it is well to point out that not only mechanical equipment of war will be purchased with this money," Mr. Howe said.

"There are many other vital needs to be financed and a most important one is medical and dental equipment." Purchases by the medical section cover a wide range and increase in value each month. May outlays showed an increase of nearly 200 per cent. above August, 1940, and purchases for the current three-month period are expected to reach \$2,000,000, compared with \$1,250,000 in the first three months of 1941.

More than \$500,000 was spent on X-ray equipment for Canadian military hospitals in the Dominion and overseas, and nearly 110 tons of drugs were ordered in the first three months of 1941. Bandages bought in the first quarter of this year would number 500,000,000 if cut into one-inch strips, the minister said. Hospital beds totalled 26,000 units, of which 18,000 were folding beds.

Physiotherapy departments have been established in the principal military hospitals. A new foreign body localization system by automatic readings, finds the exact location of shrapnel in the body in relation to skin surface. New field X-ray units house all the required apparatus in one small tent.

The pneumonia mortality rate is being reduced by use of sulphathiazole tablets, of which 10,000,000 were purchased in the last year.

"The mortality rate from cerebrospinal meningitis has been cut from 60 per cent. in the last war to 1.75 per cent. for this war," the minister said. "Speeding up the inoculation of troops and reducing to a minimum the after-effects is achieved by a new method of injection against both typhoid and tetanus at the same time."

Now manufactured in Canada is a laboratory unit with all apparatus for a mobile laboratory. Previously such requirements were purchased in Great Britain.

Breathing Exercises

German troops sing as breathing exercise as well as for morale, says an American who soldiered in Germany, and he adds that some army songs are written to require deep inhaling and exhaling.

Total war requires total effort to win it. We must all pull together for victory. That leaves no room for the "let George do it" attitude which, in a sense, borders on sabotage.

HITLER'S SISTER-IN-LAW WORKS FOR BRITAIN

Mrs. Brigid Elizabeth Hitler, wife of Der Fuehrer's step-brother, is shown at her desk in New York soon after she had begun her first day's work for the British war relief society. Mrs. Hitler points proudly to her Aid Britain pin, while a poster portrait of Prime Minister Churchill looks down approvingly. Her work with the society is voluntary.

THE VITAMINS PILING UP

The medical scientists who house-keep for vitamins have an unmanageable lot of charges. It used to be that there were but five or six vitamins known and they were called A, B, C and so on. Now chemists believe that there are at least eight varieties of vitamin B and at least ten of vitamin D. One member of the vitamin B family is known as vitamin G, and another as factor Y. Two relatives of the C type are known as J and P.

Perhaps it would be better to call each vitamin by its chemical name. In such case Vitamin E would be known as tocopherol, C as ascorbic acid and B2 as riboflavin. People are now so used to the name vitamin that the change would be confusing.

The functions of the several vitamins are of high interest. The widest functioning one is Vitamin A and it is the only one which is synthesized or activated by animals from their plant food. It is found in livers and yellow body fat of most animals and can be stored up for many months.

To obtain sufficient vitamin A, the diet should contain thin green leaves, bright yellow fruits, vegetables such as carrots, corn and sweet potatoes. Vitamin A prevents night-blindness; it is the most important of all vitamins for proper tooth formation in growing children and for resistance to infection.

The richest source of the anti-scurvy Vitamin C, is oranges and lemons. Almost any kind of seed, kept in water until it sprouts and then eaten raw, is a very good substitute. Manual labourers and athletes need large quantities of Vitamin C. This vitamin mysteriously disappears from the bodies of persons having tuberculosis. Victim of diabetes when given large amounts of Vitamin C, usually require smaller doses of insulin.

Vitamin D regulates the amount of calcium and phosphorus which the body uses for the building of bones and teeth. It is the only vitamin which does not occur in plant tissue. Its most abundant source is oily fish livers and it is generated in the body by the ultra-violet rays of the sun. Normal adults get all the vitamin D they require when they bask in the sun on beaches. If they drink lots of milk, they need not worry about calcium regulation. Milk may be "fortified" with vitamin D, and by feeding the cows on irradiated yeast, that is, yeast treated with ultra-violet rays.

Vitamin E comes from wheat germ, lettuce and tomato oils. Lack of this vitamin damages the male reproductive organs and produces abortion in the truth about vitamins has yet been published.

Duke Of Aosta

Something About Italian Prisoner And His Connection With Britain

The Duke of Aosta, who by his surrender has now completed the collapse of the Italian empire in Africa, is half French. His mother was the beautiful second daughter of the Comte de Paris, and, like her sister, Queen Amelia of Portugal, a friend of Queen Alexandra and Queen Mary. The Italian hostility to England is known to be a bitter grief to her. The Duke of Aosta is a first cousin of the late King Manoel of Portugal, who died in exile in England.

The Duke of Spoleto, brother of the Duke of Aosta, was at one time on a long visit to England, and there was talk of his marrying an Englishwoman. —Manchester Guardian.

Rubber reclaimers now consume about 250,000 tons of scrap a year.

DAUGHTER OF DESTINY

—BY—
Eleanor Atterbury Colton

CHAPTER XIV.

Devona launched her job-hunt that very morning. Clipping the "Help Wanted—Female" column from the big daily paper she'd bought at the station, she borrowed a street map from the desk clerk and planned a campaign.

Naturally, the first day she didn't find anything. Aching tired, she forced down a bowl of soup and a sandwich at a corner drug store and plodded back to the hotel to crawl gratefully into the hard, narrow bed. It had been terribly hard work—walking the long blocks between addresses to save the carfare, waiting in crowded offices, steeling herself for every interview.

But she wasn't really discouraged, she assured herself before she fell asleep of sheer exhaustion. She couldn't expect to find a job the very first time she tried.

Not even the second or third day. Nor, probably, the first week. And by having a "merchant's lunch" at the Owl every noon, she could substitute fruit and milk in her room for dinners. She lost a little weight, of course, but that was to be expected. More alarmingly, her slim resources fast grew slimmer. That was to be expected, too, she realized with threads of panic fraying her courage. She'd have to find something soon!

At the end of the third week Devona took stock again. This time with desperation gnawing at her. Everywhere, she'd met the same answer. "Sorry, we want experienced help."

Lips trembling with embarrassment—and sudden terror—Devona didn't try to answer, walked blindly out of the shabby foyer into the street.

Into the street! That's where she'd be after 3:30 this afternoon if she didn't find something.

At noon Devona pawned the pretty gold wristwatch her father had given her on her 16th birthday and the first real bitterness seeped like acid into her head. When this money was gone it meant—the end. Another 24 hours and she was beaten!

It had begun to rain as she came out of the hotel. A fine, drenching rain that would ruin her coat and put the finishing touches on her once-smart shoes. Tears much larger than the raindrops pressed at the corners of her eyes. A shabby appearance wouldn't help her cause any.

She ran half a block to the canopied entrance of a night club, huddled, gasping for breath, trembling with fatigue under the gawdy striped awning.

It began to rain now in earnest. A driving, pelting deluge as the sky grew darker. She couldn't go out in that, she thought wearily and sagged against the building. In another moment it might let up.

But in another moment a uniformed doorman stopped watching her covertly and stepped toward her.

"Waiting for some one, miss?" he asked, courteous, but his attitude indicated very pointedly that the man-

agement didn't encourage loitering in the doorway.

Devona mustered her last scraps of dignity. "Yes—a friend," and hoped it sounded as cool as she intended. It was hard to be dignified with rain dripping from the soggy brim of her hat, seeping into her thin-soled shoes.

"Won't you step inside, then, miss?" he persisted.

Devona hesitated, noticed the insignia on his visored cap, El Mexicano, in curving gold braid. Where had she seen that before?

The foyer was deserted. Past the luncheon hour now, it was still too early for the cocktail crowd.

"Who was it you said you wanted to see?" The doorman, still at her elbow, watched her suspiciously.

Devona hadn't said she wanted to see any one and he knew it. But she had to say something. Anything to give her an excuse to sit down and rest a while in one of these deep-cushioned maroon velvet chairs.

"Mr. —" A name leaped to her tongue out of some subconscious recess of her distracted mind. "Mr. Macias. Mr. Jose Macias, please."

"Certainly, miss." The doorman's attitude changed instantly. "I'll see if he's in."

Drawing a deep breath, Devona wilted into a chair, prayed that Mr. Macias would not be in or would be busy, or something.

But, no luck. He was in and he would be delighted to see her immediately.

Dully she followed the doorman across the foyer to the gray-paneled door marked "Manager." Now for the showdown and then back out into the streets again. If only she didn't feel so terribly hollow inside, so light-headed.

For a moment, Mr. Macias, alone in his elaborate, maroon-draped office, studied her coldly from behind his broad gray and chromium desk. Then, his smile breaking suddenly into recognition, he rose, came to meet her, hands outstretched.

"But, buenos dias, Senorita! This is an unexpected pleasure," and pulling a silver-velvet chair closer, "Please, sit down. I am so happy to see you again. You are in town on a little pleasure trip?"

"Not—exactly." Devona smiled wryly, sank into the chair wearily.

"Shopping, then, perhaps. And look, you will stay for the cocktail hour. I promised you some excitement, I remember." He pulled his own chair closer, his handsome dark eyes quick in their appraisal of her.

"No, thank you." Devona shook her head, anticipated the faint surprise in his face when she saw those sharp, black eyes discover her threadbare, rain-soaked shoes, the neatly darned place in her stocking, the hole in her glove. "You see, I'm hunting a job."

He stared at her, incredulously. "You—hunting a job?"

"Yes—a gay little smile. "And so far I haven't been too successful." She tried to laugh lightly, but the effort fell thudding against her mushrooming discouragement, nearly ended in a sob.

"But—you are just fooling," Macias scowled, his handsome face breaking almost immediately into another smile. "You want the career. Is not that it, Senorita? Something to play with just to amuse yourself?"

Devona shook her head grimly. "No. Something to work at so I can eat!"

For a moment Macias only stared at her. "But—you are serious?"

"Of course. Terribly serious." She laughed a little. "You see I'm—hungry!"

"But surely, your friend Mr. Brasher—"

Devona interrupted that quickly. "Mr. Brasher and I are no longer—friends." She swallowed hard. "I'm—absolutely on my own. No one even knows where I am. I left home for—personal reasons."

"Come, come. That's too bad. But maybe just a quarrel? You could forgive and—"

"No. I'm never going back," she said quietly. Not even if it meant an overdose of sleeping powders instead. "That's behind me—forever. Now, I have my own way to make."

"But you are very young—and very beautiful—to face the world alone," Devona shrugged. "Nevertheless, I have to get a job. You don't, by any chance, know of any one who needs an untrained, inexperienced girl who speaks three languages, do you?"

He shook his head slowly. "No,

LOOK OUT FOR YOUR LIVER

Buck it up right now
and feel like a million!

Your liver is the largest organ in your body and most important to your health. It pours out bile to digest food, gets rid of waste, supplies new energy, allows proper nourishment to reach your blood. When your liver gets out of order food decomposes in your intestines. You become constipated, stomach and kidneys can't work properly. You feel "rotten"—headachy, backachy, dizzy, dragged out all the time.

For over 35 years thousands have won prompt relief from these miseries—with Fruit-A-Tives. So can you now. Try Fruit-A-Tives—you'll be simply delighted how quickly you'll feel like a new person, happy and well again. 25c, 50c.

I'm sorry. If I did, I would like to help you. I would like to help the—friend of Mr. Brasher."

"But I'm not a friend of Mr. Brasher—not any more," Devona insisted doggedly. She wouldn't fly under false colors. "But—" and this time she succeeded in making her smile real. "I do need a job—desperately."

Her eyes met Macias' bold scrutiny pleadingly and for an instant her breath stopped as she saw the sly change in his expression. His teeth, even and hard and white in his swarthy face, his smile a bold challenge now. She found herself remembering Dale's wry, "Any pretty new face, and with Macias it's off with the old and on with the new."

"I see," he was saying, his eyes smiling while he toyed with some idea.

An idea. Devona sensed instinctively, that would be more dangerous, probably than starving. So, rising suddenly, she smiled again.

"Well, it's been nice of you to see me," she said, just as if she noticed nothing of his changed manner. "And if you do hear of a job, let me know."

Macias rose, too. "You must leave your address, Miss Raebourne. I will be getting in touch with you." Even the pseudo-Mexican accent had disappeared from his speech. Not the bowing, anxious innkeeper now! But still—and more dangerously now—the bold, dark-eyed gallant.

Panicked a little, Devona tried to direct her numb feet to the door. But the long, wearing hours of walking and waiting, the lack of food, the discouragement—all took sudden toll of her flagging strength.

For a moment, the door she faced wavered crazily, then slipped farther and farther out of reach. She was fainting! Terrified she clutched at a chair back, missed it, felt herself falling, falling—falling—into a soft, black cloud.

But she mustn't faint! Not here—not now. Desperately she tried to fight her way back. She must keep her wits. She must!

It was no use. Even the floor was giving way under her now. And—somehow—it just didn't matter. (To Be Continued)

Had Reason For Choice

English Boy Knew Why He Wanted To Understand German

David Stevenson, 15, is the son of W. H. Stevenson—who was editor of the London Daily Herald and now is with the British Ministry of Information. David has been going to school at Charter House, and recently matriculated at Oxford. When the exam results were published, his father discovered that the boy had won honors, in the language test he had selected German. The boy confessed that he had been studying German, privately, and without any tutoring. "We've lived in France and you speak French fluently," the senior Stevenson reminded him. "You also can speak Spanish and Italian. Why did you pick the German language?" "Because by the time I'm 18," young David explained, "there will be an army of occupation in Germany and I mean to be with it." New York Post.

With 99½ per cent of organized labor in Britain voting for a war to the finish with no negotiated peace, the spirit of the British people is unmistakable.

Women For War Work

Several Thousand Women Volunteers Will Be Enlisted

Several thousand women volunteers will be enlisted within the next few months to serve as full-time auxiliaries in the armed forces. War Services Minister Thorson announced at a press conference.

The women volunteers will form a pool from which women's auxiliary corps in the army, navy and air force will be supplied by personnel are required.

Applications for entry to the women's corps will be received by the War Services Department and the National Defence Department will organize the Canadian Women's Army Corps.

National Defence officials estimated that from 2,000 to 3,000 women can be absorbed into this corps in the next six months.

Mr. Thorson asked that women withhold their applications to join until the necessary regulations have been worked out. He said that suitable recruits would be taken even if they were not members of voluntary women's organizations which have undertaken training in Canada. The plan has no connection with recruiting now being done in Canada for women's services in the United Kingdom.

The women will be engaged as drivers of light motor vehicles, as cooks and waitresses in hospitals and messes, as canteen helpers, store women, telephone operators, messengers and clerical workers.

They will be uniformed and will be required to enroll on the same basis as soldiers. Their pay will be "somewhat lower than that of soldiers."

Mr. Thorson said the present call was for service in Canada, but both ministers agreed service overseas on a voluntary basis would be considered if the demand arose.

Col. Ralston said enrolment would be gradual as accommodation at camps would have to be constructed or billeting space obtained. The corps will have its own officers.

GEMS OF THOUGHT

REFORM

Charles Fox said that restorations were the most bloody of all revolutions; and he might have added that reformations are the best mode of preventing the necessity of either.—Colton

Every reform, however necessary, will by weak minds be carried to an excess which will itself need reforming.—Coleridge.

This is a period of doubt, inquiry, speculation, selfishness; of divided interests, marvelous good, and mysterious evil. But sin can only work out its own destruction; and reform does and must push on the growth of mankind. Mary Baker Eddy.

He who reforms himself, has done more toward reforming the public, than a crowd of noisy, impotent patriots.—Lavater.

How important, often, is the pain of guilt, as a stimulant to amendment and reformation.—John Foster.

All reform except a moral one will prove unavailing.—Carlyle.

Women Carpenters

Are Going To Repair And Rebuild Homes In Croydon

Corps of women carpenters and joiners, most of whom had to be taught how to hold a hammer, has been set to the task of repairing and rebuilding bomb-blasted homes in Croydon.

Most of the women, who get 22 cents an hour now and will get 33 cents an hour after six months, are able to hit a nail with fair accuracy after a few hours at the shop and have been taught to saw a fairly straight line.

"We expect a big expansion of women carpenters," said C. H. Walker, superintendent of reconstruction in Croydon, "and we expect them to continue after the war."

The feminine right to primp has been recognized on this job. The workers get an extra 22 cents a week for soap and towels.

The wedding ring was regarded as a pagan symbol by the early Puritans. 2419

HOME SERVICE

EXERCISE CAN BRING BACK
"LOST" YOUTH AND BEAUTY

Double Chin Can Be Conquered

Getting old? That double chin means only that you're getting soft!

Chin and neck exercises, you know, can vanquish a double chin, just as right exercises reduce fatty hips or a bulgy tummy. When unused muscles are brought back to youthful firmness that "lost" beauty returns!

A simple daily chin routine, including this exercise, should do the job very nicely:

1—Turn your head sharply to the right until chin is over right shoulder. 2—Keeping chin over shoulder, tilt head backward slowly and lift face to ceiling. 3—Lower head slowly.

Repeat this five times, turn head to left and repeat. After a minute's rest, repeat exercise again until you've done it 20 times.

Then, if you have other figure problems, go right on with the rest of your "youthifying" program—exercises for unlovely waistline, bust, arms, hips!

Our 32-page booklet has exercise routines to correct all these figure faults, as well as poor posture, "dowager's hump," heavy legs. Also has general daily exercise routine, special exercises for relaxing tense nerves, relieving aching feet.

Sends 15 cents in coins for your copy of "Best Exercises For Health and Beauty" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

- 121—"How To Improve Your Vocabulary"
- 116—"How to Choose and Care for Your Dog"
- 161—"New Ideas in Making Curtains and Draperies"
- 174—"How To Be A Good Swimmer"
- 185—"Swing's the Thing in Golf"
- 188—"Easy Lessons in Guitar Playing"

Australia Takes Action

War Industry Strikes And Lockouts Outlawed For Duration

Strikes and lockouts in war industries have been outlawed in Australia "for the duration." The Prime Minister threatened to use the emergency powers given him last year to send "disloyalists responsible for such stoppages" to a concentration camp. At the same time he warned uncooperative employers that he would not hesitate to take over their plants.

With the exception of New Zealand, Australia has proportionately the strongest Labor party in the British Commonwealth of Nations. Thirty-six of the 74 seats in its House of Representatives are occupied by Laborites. Yet that has not prevented Australia from banning strikes and other stoppages of work, which would interfere with its all-out effort.

Every fourth married woman in Copenhagen, Denmark, is self-supporting, according to government figures.

"I have no inferiority complex," declared Mussolini recently. Just an inferiority one.

The World of Wheat

By H. G. L. STRANGE

The Canadian Seed Growers' Association has just held its 37th Annual meeting, this year in Quebec. Matters of interest to French speaking and English seed growers and farmers alike were considered. The necessity for an increased production of high quality vegetable seeds, to replace those usually imported from Europe; the production of seed of the new higher yielding Hybrid corn varieties, which have swept like a prairie fire across the United States, and which are now being introduced in Canada and the simplification of the notations of the generation pedigrees of the Registered seed were discussed by the delegates present who represented every province in Canada. But how the Association could best help Canada's and the Empire's war effort was the topic with which the members were mainly concerned.

At the annual dinner, Mr. Adair Godbout, the Premier of Quebec, made a most inspiring address; "The French speaking Canadians," he said, "will match every sacrifice made by the English-speaking Canadians, both in the providing of money, of work and of manpower in the armies. Quebec is ready to fight to the last sacrifice, for the maintenance of the Empire and of our 'way of life'."

The seed growers included that a new grand leader had arisen in Canada; another Laurier many thought.

Following factors have tended to raise prices: European crop prospects continue poor - Australian wheat crops in need of rain - Russian German war endangers about 400 million bushels of Russian bread grains - Wheat acreage of western Canada reported by the Hon. Mr. J. G. Gardiner as 37 percent below 1940.

Following factors have tended to lower prices: U.K. Government urges farmers to expand acreage to all crops - Argentine moisture and crop conditions generally excellent - U.S. spring wheat area continues to make good progress - Broomhall estimates Argentine exportable wheat surplus 125 million bushels 125 million bushels up 75 million from a year ago.

CABBAGE CATERPILLARS CONTROLLED BY DUSTING

Dusting with arsenate of lead and hydrated lime is the most widely recommended remedy for the velvety green caterpillar, also known as the imported cabbage worm, which feeds on cabbages and cauliflowers, eating large circular holes in the leaves and at times boring into the centre of the plants. One part of the poison, states Alan G. Dustan, Division of Entomology, Dominion Department of Agriculture, should be mixed with eight parts of hydrated lime and dusted on the plants in the early morning or late evening when the leaves are wet with dew. Particular attention should be paid to the central portions of the cabbages and cauliflowers as the caterpillars prefer to feed there. Two or three applications should be made as required, care being taken to apply the dust immediately feeding becomes evident. Due to the waxy condition of the leaves, spraying has not given satisfactory results.

If the plants have to be treated shortly before being marketed, fresh pyrethrum powder should be used, one part to three parts of hydrated lime or flour. Pyrethrum is non-poisonous to human beings. It can be bought at local seed houses, drug stores, or

SERVE BY SAVING!

Now You Can Do Your Bit

Through the purchase of WAR SAVINGS CERTIFICATES every patriotic man, woman and child in Canada, regardless of station, is afforded an opportunity of making a personal contribution to Canada's War Effort.

When you buy WAR SAVINGS CERTIFICATES you save money for the future and supply "dollar ammunition" to back up the men who are fighting our battles overseas.

WAR SAVINGS CERTIFICATES are sold through all branches of this Bank. Backed by the Dominion of Canada, they are the safest kind of investment you can make. Held to maturity, they are worth 25% more than you pay for them. For every \$1.00 you invest now, you receive \$5.00 seven and one-half years hence.

Buy your first certificates to-day — then add to your investment regularly by purchasing at least one certificate every month.

WAR SAVINGS STAMPS

If you cannot afford to pay cash for a \$5.00 certificate you can purchase WAR SAVINGS STAMPS. These cost only 25c each. Sixteen stamps (value \$4.00) can be exchanged for one \$5.00 certificate. WAR SAVINGS STAMPS are sold by all branches of The Royal Bank of Canada. Your nickels, dimes and quarters, as well as your dollars, are important in helping to meet war expenditures. Encourage your children to save through the purchase of WAR SAVINGS STAMPS.

Where Fairways Meet the Sea

The golfer who occasionally substitutes his clubs for fishing tackle, who enjoys a brisk work-out on the tennis courts, an invigorating Atlantic plunge or soothing sun-bath, who likes scudding before salt-laden breezes in a sailing craft, and has a weakness for sea-food, can satisfy all these urges, and other vacation whims as well, at the famed Algonquin Hotel at St. Andrews-by-the-Sea in old New Brunswick.

Open this year from June 28 to September 2 the charming Canadian Pacific Hotel is enjoying one of the most successful seasons in its history. Tourists who formerly visited Europe in quest of vacation pleasures have found parts of the New Brunswick countryside a worthy reproduction of the Old Country, the sea-girt St. Andrews golf

course as thrilling as its famous Scottish namesake, and sheltered Fundy waters as inviting as the Riviera!

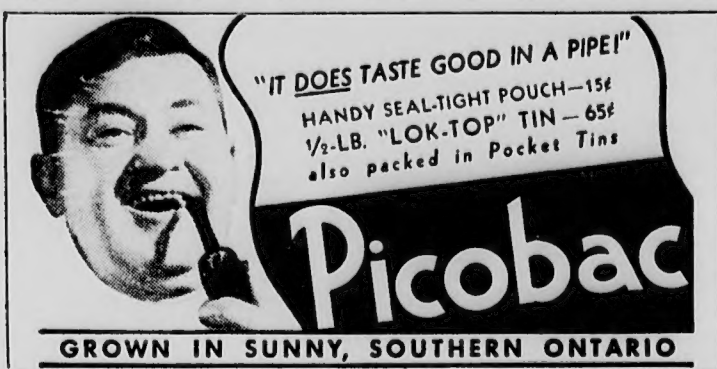

Summer life at the Algonquin is a continual round of pleasure from the first dip in Katy's Cove to the final strains of the last waltz in the hotel ballroom. Its sun-drenched beaches are thronged continually with happy bathers and bronzed sun-worshippers, while the more skillful race out to diving rafts, show off their newest swim dive or indulge in other forms of "aquabatics." Shivers are practically unknown at Katy's Cove, its sands absorbing the sun's heat and releasing it at high tide for the bather's benefit.

No golfer who takes his game seriously would tour the Maritimes without a visit to St. Andrews. Inspired by the bracing tang of the sea, velvety greens,

sea-girt fairways, and unusually springy turf, the golfer usually finds the 18th hole arrives all too soon and his score card shows surprising results! Many an international tourney is contested on Algonquin links, at which time the hotel guest register reads like a "Who's Who in Golfing".

Deep-sea fishing for cod, mackerel and haddock is available literally at the hotel's doorstep, while scrappy trout, bass and land-locked salmon inhabit the St. Croix Valley lakes a few miles distant. Other attractions include hiking, motorcycling, cycling and boat excursions to nearby Campobello Island, site of President Roosevelt's summer home.

St. Andrews is easily accessible over Canadian Pacific lines from large centres in Eastern Canada and connecting lines in the United States.

Picobac
GROWN IN SUNNY, SOUTHERN ONTARIO

The Surplus Wheat Problem

Three totally unrelated items appearing in the daily press within a few days of one another afford an excellent example of the statement that situations and conditions can change so rapidly that they may result in the unanticipated solution of problems which have hitherto appeared insurmountable.

The news items referred to all have or may have actual or potential relationship to the solution of the surplus wheat problem which has in the past year or so sorely perplexed the governments, farmer organizations, business and the individual farmers of this country.

One of these items is an announcement by Hon. J. G. Gardiner of the possibility that some of the huge surplus of Canadian wheat may be utilized to assist Russia as a result of the unexpected onslaught of Hitler and his hordes upon the U.S.S.R. and particularly on the Ukraine granary of that country. Another is the announcement that the Australian government has devised a plan for the conversion of some of the wheat in that country into 22,000,000 gallons of power alcohol as a substitute for gasoline. The third is an expression of hope by the Dominion cerealist, Dr. L. H. Newman, that bread containing a minimum of 400 international units of B1 per pound in its natural form will appear "sooner or later" on the domestic market.

All three of these items point in the direction towards at least a partial solution of the immediate problem of bursting Canadian wheat storage facilities. One or more of them might go a long way towards the entire solution of the problem.

Many Unknown Contingencies

While the use of Canadian wheat to feed the Russians depends largely upon the course the war will take within the new few weeks or months as well as many other at present unknown factors over which this country has very little control just now; it at least opens the vista of a potentiality which should not be disregarded, if and when time and circumstances make such disposition of some of this huge surplus a possibility, and an expedient possibility.

The provision of wheat to the Russians, however, is hedged around by so many unknown contingencies, that little or no reliance can yet be placed upon this possibility as a partial solution of the problem at this date, and it would be the part of wisdom, for the present to concentrate on other measures, and especially those means which would ensure increased domestic consumption of this surplus commodity. Both the Australian plan to provide for conversion of wheat into power alcohol and Dr. Newman's proposal fall within this category.

The economic feasibility of substituting power alcohol derived from wheat, in whole or in part, for gasoline in Western Canada with its apparently large reservoirs of petroleum not yet exhausted is highly doubtful until some cheaper method of converting wheat into alcohol has been found. Investigations and experiments conducted elsewhere have shown this to be the case at the present time. The exigencies of war, however, may make production of alcohol for power purposes from wheat a necessity, no matter what the cost; or, dwindling supply of petroleum and cheapening of the process of turning wheat into power, or a combination of both, may open the door for the economic use of the latter. In any event, it is another possibility which should not be overlooked.

An Economic Feasibility

Dr. Newman's suggestion, however, is one which has the merit of economic feasibility and, insofar as domestic consumption of bread is concerned is one in which the Canadian people have complete control. It is a partial solution to the problem of wheat congestion which should only not be neglected, but one which should be pushed to the limit of its possibility.

Dr. Newman intimated what has been voiced as at least a suspicion in this column before, namely that the life-giving, health conserving vitamin B1 is of greater value for human consumption when furnished in its natural form as found in the wheat germ, than when provided synthetically in the form of chemicals. Moreover, he pointed out, that the 150 international units per 100 pounds provided in some of the commercial flours used by bakeries is not sufficient. The desired objective, he declared, is at least 400 international units per pound.

The objection to the incorporation of the readily assimilable B1 vitamin as found in the germ of the wheat has been removed by the comparatively recent discovery of a milling process which retains this highly valuable content without producing a flour that will not keep, and it can be done, without additional cost.

If the people knew that they were getting all the B1 they require in its natural and best form in their bread, they would not have to seek it in other and more expensive foods or to purchase it in chemical form and this would result in increased consumption of bread, hence of wheat.

Greater consumption of bread, impregnated with one of the most important necessities of life and health in its best form would also result in all round improved health for the nation as a whole and, as Dr. Newman truly points out, bread would again become the "staff of life," in its highest accepted meaning.

Soldiers manning a defence post in Scotland don't have to gather twigs and grass to camouflage their guns. Flowers growing in sand bags do the job.

or the war, visitors to Banff in the Canadian Rockies in April were 400 per cent. more than in April 1940.

A 40-pound beaver is able to handle a 60-pound log on land or a 100-pound log in the water.

AEROMATIC METER

Test Drawing Nearer

But Britain Will Repel Invasion Or Die Fighting

Lord Beaverbrook believes that the great test for British survival draws near. How soon Hitler will attempt to invade the Motherland, Britain's Minister of State can not say, but he feels that it will be soon and that the people of the United Kingdom "must fight or fall," for they are resolved to conquer Hitler or die where they stand. They will be no retreat.

According to English law the seashore is that portion of land situated between the limits of high and low tides.

Vitamin Bread

Hope To Establish A Standard Grade Of Flour For The Purpose

Hope for establishment of a government standard grade or brand of flour and bread containing a minimum amount of vitamin B1 was expressed in an address prepared for delivery at Guelph, Ont., by Dr. L. H. Newman, Dominion cerealist, Ottawa.

He spoke at the regional convention of the Canadian Society of Technical Agriculturists.

Dr. Newman suggested the vitamin should come from the wheat itself and not from synthetic processes, and that measures be passed insuring that those offering such flour or bread for sale would be complying with legal minimum requirements.

"We believe that if and when such a loaf comes to be recognized by the medical people of this country and sponsored by our own department of health, that our white bread will once again come to be regarded as the 'real staff of life,'" he continued.

"We feel that an increased consumption of the new type of bread which we feel sure will sooner or later appear on the market, not only will mean much to the health of our people but will assist materially in increasing the consumption of bread and therefore wheat."

Tests of commercial flours used by bakers at present showed vitamin B1 as approximately 150 international units per pound, Dr. Newman said, while the objective desired was at least 400 international units per pound.

SELECTED RECIPES

CAULIFLOWER AU GRATIN

1 medium cauliflower, cooked
10 Christie's Soda Wafers, crumbled fine
Salt and pepper
1 cup milk
3 tablespoons grated Canadian cheese
2 tablespoons butter

Separate cauliflower into flowerets. In a greased baking dish put alternate layers of cauliflower and wafers. Season and pour milk over all. Sprinkle cheese on top and dot with butter. Bake in a hot oven (475 degrees F.) for 15-20 minutes. Six portions.

CRUNCHY FLAKE MACAROONS

2 egg whites
1 cup brown or granulated sugar
1/2 teaspoon vanilla extract
2 cups corn flakes
1/2 cup chopped nut meats
1 cup shredded coconut

Beat egg whites until stiff but not dry. Fold in sugar; add flavoring, corn flakes, nut meats and coconut. Mix carefully. Drop by spoonfuls on well-greased baking sheet. Bake in moderate oven (350 degrees F.) 15 to 20 minutes. Remove immediately from pan. If macaroons stick, place pan on damp towel and remove macaroons using spatula or sharp knife. If macaroons become hardened to pan they may be returned to oven for a few minutes to soften.

Yield: 1 1/2 dozen macaroons (two inches in diameter).

In Spite Of Scars

All Who Love Freedom Will Prefer London To Paris

Freedom is only for those who defend it, says Canon Cody.

And so is peace of mind.

Consider London and Paris.

Paris is still large and unscarred, but throughout the length and breadth of the world, secretly or openly, bitterly or contemptuously by friend and foe alike, it is considered as a large city populated by harlots and hirelings.

But London. By virtue of its suffering London has grown in stature until the crudest Cockney of them all has a glory all his own.

The Good Book says something about the futility of a man saving his life and losing his soul.—T. R. Henry in Toronto Telegram.

Thinking Back

No doubt Hitler often thinks of the days when he was a bum on the streets of Vienna, perhaps with clothing that was not quite whole; and Mussolini probably recalls the evil days when he was starving in Switzerland before a Russian countess rescued and fed him.

There are 67 waterfalls with authenticated heights greater than Niagara's.

In the Solomon Islands of the Pacific Ocean, a necklace of beetles legs is used as a love token.

DURHAM CORN STARCH

Danger To Face

Another Common Enemy That's A Menace To Mankind

Summer diarrhoea of babies, typhoid fever, eye diseases and other dangerous and painful infections come in the wake of the common house fly. We face this danger every year during the hot weather. Lectures and writings by medical men, health authorities, and other experts have done a lot towards educating people to fight this menace.

However, you cannot educate a fly and flies, being no respecters of persons, still invade our homes and stores with impunity. When you consider that the bacteria on a single fly's hairy body may number five million and that these carriers of germs are born and bred in filth which may be deposited in food or on the infant in his cot, it can readily be understood how important it is to exterminate every fly without delay.

And flies, if left alone, multiply phenomenally, too! Of the many methods for killing flies, probably the quickest, most humane and most deadly is to place a few Wilson's Fly Pads in the most suitable places throughout the house. They're inconspicuous and kill all the flies—once and for all. It's such an easy way to eliminate the fly menace in our homes and stores and thus help make our community a healthier place in which to live.

Another point of interest to people who suffer from those troublesome and destructive pests—ants—Wilson's Fly Pads offer a sure-death remedy. Just a teaspoonful of sugar, water and a Wilson's Fly Pad is all that's needed.

Not Taking Advice

Nazis Have Dropped Leaflets Telling Britons To Give Up

Leaflets dropped on the British Isles by Nazi planes advised Britons to give up because they would be doomed to starvation "this year or early next year." The leaflets, single sheets printed on both sides in English, quote various statements by President Roosevelt on British aid and German claims of the sinking of innumerable British ships in the battle of the Atlantic. Britain's avenues of supply are being "finally" closed, the leaflets said.

Air Training Plan

To Train Ground Crew Personnel For Overseas Work

Hon. C. G. Power, minister of national defence for air, said that the Commonwealth Air Training Plan is producing 25 per cent. more pilots, air observers, air gunners and wireless operators than was expected when the plan was first projected.

Mr. Power also revealed that training of ground crews has been so successful that it is proposed to man all 25 R.C.A.F. squadrons to be formed overseas. R.C.A.F. squadrons now are manned by Royal Air Force ground crews.

Several thousand ground crew personnel will be trained for overseas work, he said.

The air minister added that one of the most interesting experiments in the training plan was formation of the "composite school" for the "washed-out" pilot, revealing for the first time setting up of such a school. It is located at Trenton, Ont., and is under direction of Squadron Leader Denton Massey.

"Only one per cent. of the washed-out pilots have been granted their discharge if they wish, but they would rather remain to be of some assistance in the great cause."

Her Only Home

The London Daily Sketch says a woman was asked her address at a London hospital. She answered, "Bed No. X Piccadilly Circus Tube Station." Her only home was the tube shelter where she goes each night. The G.P.O. frequently receives letters directed to public shelters. They are safely delivered by the postman.

In one month nearly 4,000 Berlin shopkeepers were fined for violating Nazi government price laws.

Halifax is Canada's chief port on the Atlantic seacoast.

WOMEN WANTED

33 to 52 years old. Women who are restless, moody, NERVOUS—who fear hot flashes, dizzy spells—to take Lydia E. Pinkham's Vegetable Compound. Pinkham's is famous for helping women during these "trying times" due to functional irregularities. Get a bottle today from your druggist! WORTH TRYING!

Presto-PACK

BRINGS A LOT OF DELIGHTED "OH'S..."

More convenient, Presto-Pack—the new type of package, always ready for use. Just hang a package in your kitchen, you will be pleased with its handiness. With one hand pull out one or more sheets as wanted, the package keeps the remainder free from dust for future use. Presto-Pack is the handiest form in which waxed tissue is sold.

New And Broader Measures In The Field Of Public Health Call For Public Leadership

"It is the emphatic will of our Canadian people, expressed throughout our whole democratic system, that the care of the public health shall be a first concern of the Government," Hon. Ian Mackenzie, Minister of Pensions and National Health, declared in an address heard over the national network of the C.B.C., under the auspices of the Health League of Canada.

"The will of the people governs this country and if, as I believe, the people of this country demand that modernized health measures be devised, and organized, and put in operation in Canada, then the Governments, federal and provincial, must get together and find a way to give effect to the will of the people," Mr. Mackenzie said.

The minister said that victory in the field will be a hollow achievement in this war, "If all that remains is a devitalized homeland." "If we are to be worthy of our fighting men," he went on, "we must strive to go forward in our war against ill health."

Mr. Mackenzie pointed out that the cost of the Royal Canadian Air Force last year, including the great Air Training Plan, was two hundred and twenty-five million dollars. "But in that same year the cost to the Canadian people of ill health was more than two hundred and fifty million dollars," he declared.

It is estimated, the minister pointed out, that on any one day Canada has 50,000 wage earners idle through illness. Much of this wastage is avoidable, he said. "The responsibility rests squarely on the shoulders of the people. We have our individual responsibility and we have our collective responsibility as citizens."

"Public responsibility for the national health," he continued, "is chiefly concerned with preventing disease. We do this by quarantine regulations, pure food laws, sewage disposal schemes, provision of pure water supplies, pasteurization of milk, and similar measures."

Mr. Mackenzie said that in the past ten years, since the Dominion actively entered the public health educational field, there has been a remarkable reduction in the death rates from controllable and preventable disease. "Typhoid fever deaths have been reduced by two-thirds," he said, "Scarlet fever by 60 per cent.; diphtheria by 75 per cent.; tuberculosis by about one-third."

The minister pointed out that in the four years of the Great War no fewer than 60,000 young Canadians lost their lives. "In the four years

ending in 1935," he declared, "the number of deaths in Canada of infants under one year was 76,000. In peace-time the casualties among newborn children were greater than our war losses in a similar period."

At the recent national conference of health authorities held in Ottawa special consideration was given to health policy in the critical post-war years, Mr. Mackenzie stated. "Our purpose is to be ready," he went on, "with a health program which shall be a major and vital part in our national reconstruction after the war."

He continued, "It is very important that the Government should be doing its part in endeavoring to conserve the national health especially in these days of national crisis. But this war is not a mere Government activity, the whole people of Canada are at war. We all have our parts to play as individual citizens."

He divided the task on the home front into two parts: first supporting the efforts of the armed forces with equipment and supplies, seeing that they lack nothing which will help them to defeat the enemy; and second, maintaining home institutions, caring for the welfare of those who are left behind, and seeing to it that the country which our men have gone forth to defend continues to move forward in the path of orderly progress.

"To-day we see the stirring of a great popular and international movement towards health, the people's fight for freedom from disease, for the right to be born well and to live well," the minister declared. "Science has shown the way. It is for public opinion, and public leadership, to put to practical use the knowledge which has been acquired."

"Let us," he urged, "during this time of war, when health and fitness are a prime requisite of success, devise and press forward new and broader measures in the field of public health, erecting, perhaps, a structure in the realm of health policy which will stand forever as a monument to the sacrifices of this tragic conflict."

"To achieve victory we must have the greatest possible unity in our national effort," the minister went on. "We must utilize every resource in the common cause. The greatest and most valuable resource is the human resource. We have taken precautions for the health of the troops overseas. Likewise we must take precautions on this great home front in Canada." Mr. Mackenzie concluded: "Let us in a great, constructive, humanitarian way, prepare for peace, both nationally and internationally."

Daring British Raid

Parachute Troops Land In France And Take 40 Prisoners

British parachute troops raided the airport at Berck, France, and destroyed 30 German planes on the ground before making their escape in motor boats with 40 prisoners the consulate general of the Czechoslovak republic said in a statement.

Basing its report on advices said to have been received from Lisbon, the consulate said that while Royal Air Force planes bombed Calais and Boulogne, parachute troops, aided by British agents and French sympathizers advanced to a pre-arranged meeting place then separated into three groups to make their attack.

"While one party, heavily armed with Tommy guns and hand grenades, overpowered the airfield guards and rushed the control room, overpowering its occupants before they could give an alarm, the second party surprised the barrack room where several Luftwaffe pilots were waiting orders to take to the air," the statement said.

"The third party, meanwhile, was busy on the airfield destroying about 30 planes which were on the ground."

After the attack, the consulate added, the British troops retired to the seashore with about 40 prisoners and several Frenchmen who wished to join the forces of Gen. Charles de Gaulle. There they were picked up by naval motor torpedo boats.

The statement added that "the entire operation was carried out so efficiently that the British were already on their way home before Nazi headquarters learned of the attack."

Had Fine Memory

Hotel Man Tells Story About Late King Albert Of Belgium

John Horgan, who rose to success in the hotel field because of an unusual memory, pays tribute in a book he is writing to "the most perfect memory" he even encountered—that of the late King Albert of Belgium.

Horgan writes that the incident began at a hotel in Cincinnati. King Albert visited that city and, pleased at the arrangements made by Horgan, asked to have the manager brought before him.

The person who carried the message couched it in such a peremptory tone that Horgan snapped: "Tell the King I'm too busy to see him now."

Years later Horgan went to Europe where he visited Ysaye, the noted violinist who had appeared with the Cincinnati Symphony Orchestra. As it happened Ysaye that day was calling on King Albert and he took Horgan with him. They found Albert playing checkers with his son, Leopold.

"Horgan," said the King as the American was introduced, "You took a long time coming to see me, but sit down my friend."

Approximately 14,000 sacks of gold, shipped from France a year ago, are stored at Martinique.

About ten quarts of milk are required for a pound of butter.

Formation Of Air Cadet League Of Canada Is Making Progress In West

The organization of a provincial committee of The Air Cadet League of Canada has just been completed in Manitoba and this committee will assist in the development of Air Cadets Units throughout that province.

Mr. Arthur Melling, honorary secretary-treasurer of The Air Cadet League of Canada, and Flight Lieutenant R. W. Frost, R.C.A.F. Liaison Officer, made a flying trip to Winnipeg to attend the inaugural meeting of the provincial committee on June 19th, and they also attended, on the following day, a meeting in Regina of those interested in forming a provincial committee in Saskatchewan.

Mr. Melling stated he was greatly impressed and pleased with the progress made in the west. Great interest and enthusiasm was shown by many prominent citizens and school authorities, which augured well for the success of the air cadet movement. Also, full co-operation is being given by R.C.A.F. officers from both the western training commands.

The organization of committees in the remaining provinces is expected in the near future and both officials felt confident that the training plan will be in full swing by the fall of this year.

Countless enquiries are coming in to headquarters evidencing the enthusiasm of boys all across Canada in the air cadet movement. "It is this keen interest of the boys that has been responsible for the development of the scheme," stated Flight Lieutenant Frost. The league is patterned after a proven organization, the Air Cadet Defence Corps of the United Kingdom, which was started before the war. Through this organization there are now 190,000 boys taking aviation training in Great Britain.

The Canadian boys will have elementary training similar to that supplied to the R.C.A.F., which covers the ground-work before actual flying. The basic training will cover two years and take approximately 216 hours. The subjects to be studied are: administration, aero engines, aircraft recognition, airframes, airmanship, armament, drill, first aid, knots and splices, maps and map reading, mathematics, model building, physical training, signals and theory of flight. Upon completion of the basic air cadet training, air cadets may specialize in aero engines, aircraft construction, air armaments, air crew aerial navigation, aerial photography, radio or wireless. Much of the work will probably be done through schools, outside of school hours, and it is anticipated that in some provinces it may be possible to allow high school boys taking the air cadet course credits which would count towards matriculation. There is a Dominion Government capitation grant of \$1.00 per year to be paid to units for each proficient senior air cadet who has attended a minimum number of lectures and parades. It

will be possible at some points, where there are air training schools, for school teachers, during the summer months, to attend short courses in air subjects to prepare them as instructors for air cadet training.

Each of the six Royal Canadian Air Force commands will have an air cadet liaison officer to aid co-operation between the air force and unit committee.

Wing Commander D. R. MacLaren, who presided at the meeting was named chairman of the provincial committee. Gilbert M. Eaton was appointed vice-chairman and Major R. C. Huggard, secretary. Wing Commander MacLaren and Mr. Eaton, together with Hon. Ivan Schultz, Minister of Education, are Manitoba members on the national board of directors. With these four on the executive committee will be Fred Fergusson, Dr. J. C. Pincock and W. A. Strath. Committee members include: Group Capt. D. W. F. Bonham-Carter, senior air staff officers No. 2 Training Command R.C.A.F., Reeve D. A. Best, St. James; James Black, chairman of the Winnipeg school board; P. E. Ridd, chairman of the school cadet committee; A. Kitz, Dauphin; H. R. Smith, Brandon; H. M. Tucker, Ralph Carey, Col. J. Cadman, Portage la Prairie; Dr. A. W. Hogg, Dr. T. F. Blight, Leo Simmonds, Dr. R. Snyder, Clare Moore, F. C. Babington, Flying Officer H. C. Anderson, press liaison officer, No. 2 Command, F. K. Williams, K.C., C. H. Smith, Dr. J. C. Pincock, Supt. of Schools; H. E. Sellers, Joseph Harris, Mayor Queen, Mayor George MacLean, A. W. Green, Flin Flon; I. H. Phinney, The Pas, and D. L. Cameron, Manitou. The Honorable A. F. McWilliams, K.C., Lieutenant Governor, has consented to act as patron of the Manitoba division.

The Prairie Lily

Chosen As The Floral Emblem For Saskatchewan

Adopted as the official floral emblem of Saskatchewan at the last session of the legislature, the prairie lily is a flaming red flower slightly orange at the base with black spots on the petals.

Botanists claim that the lily selected by the government is the most beautifully colored of the entire wild lily family. It has bright green leafy stems, a flower-cup which opens upward, and six sepal divisions narrowing to a stemlike slenderness toward the base. The leaves are linear shaped and are alternately or irregularly distributed on the stem.

Actually, the color varies from orange-scarlet to scarlet-orange or paler, and the inner part of the cup is spotted with purple-brown. The sepals do not recurve. From one to three flowers are borne at the branching summit of the plant-stem. The botanical name of the lily is "Lilium Philadelphicum Andinum."

School For Rookie Cooks

R.C.A.F. Has Started Classes At Agricultural College In Guelph

A school for "rookie" cooks is the latest wrinkle in the Royal Canadian Air Force.

The youngest of the three fighting services has inaugurated a series of cookery classes in the class-rooms of Ontario Agricultural College at Guelph, Ont.

Preliminary plans call for about 120 pupils to take courses lasting several months under direction of members of the college staff. Facilities for training have been provided through courtesy of the Ontario government.

Classes are divided into two stages—the "AB initio" or primary stage and the advanced classes. Duration of each stage will depend on the pupils' aptitude or experience. Lectures will cover rationing of foods, dietetics, food values, and the all-important topic of food management.

Australian soldiers are called diggers because so many of their ancestors were so employed in the country's gold rush days.

What's In A Name

Scottish Cattle Owners Evidently Think It Affects Sale Price

This story is taken from the Glasgow Herald: Current history is often reflected in the Scottish bull-sale catalogues, for breeders, we have noticed, have the habit of naming their favorites after places or persons that are in the news. There is always a high reserve price on a Churchill.

We have been studying the Perth and Aberdeen Spring sale catalogues, and must confess that we are a little disappointed. The cabinet has been quite neglected, Lease-and-Lend is forgotten, and the retiring qualities of the Italian General Staff have not been considered in the naming of the bull calves. There is one Maginot which should not be easily sold, although a daring speculator may take a chance on Weygand, and there is a Hitler (he'll bellow a bit).

Narvik gives away the age of another entry, but the only other topical names we can find are a General Smuts, two Spitfires and an Air Raid.

Mr. Brown: I am very worried about my son's health.

Mr. Jones: What has he got?

Mr. Brown: A motorcycle.

World's deepest mine is one which goes down into the earth more than a mile in search of gold. It is in Brazil.

Important Naval Base

Alexandria Has Been In Use More Than 2,200 Years

Bombing of Alexandria, Egypt, draws renewed attention to the fact that Great Britain is depending on that outpost of the Suez canal as one of its chief naval bases in the Mediterranean. Some military experts have contended that Axis seizure of Alexandria would be a greater loss to the British than would the capture of the Suez canal itself. Alexandria became a naval base more than 2,200 years ago when Alexander the Great founded the port to aid in his campaign against Persia, according to a bulletin from the National Geographic Society. Its location, 130 miles northwest of Cairo, and about 150 miles west of Suez, has made it an important maritime centre ever since.

This letter, used by a bill collecting agency, is said to have worked wonders: "Dear Sir, Please send us the name of a good lawyer in your city. We may have to sue you."

A far-sighted person can sometimes see the planet Venus, not as a single bright object but crescent-shaped like the moon.

Best preservatives for farm timbers are creosol, creosote, and zinc chloride, according to research.

ANY DAY A FISH DAY

LOCAL & GENERAL

Mr. and Mrs. J. V. Berscht and Joan returned Saturday from 2 weeks vacation at Sylvan.

Miss Dorothy Smith of Edam, Sask., is visiting her sister Miss Marjorie Smith.

The Red Cross will hold a tea and sale in A. G. Studer's store on Sat., July 26. Keep up the good work! 2

Rebuilt Maytag, also several hand machines and used Ranges for sale cheap—Builders Hardware

Capt. Joyce Morgan and Lieut. Ann Morton of the Women's Service Corps paid a visit to the Red Deer detachment on Tuesday evening. They were accompanied by Miss Peggy Morgan and Barbara Spence

Dave Metzgar of Strawberry Hill, B.C., is visiting friends and relatives in the district.

Saturday's special at Scott's—50 only Men's Work Shirts regular price \$1.25. Sale Price 99c

Mr. and Mrs. Fife, of Seattle, Wash., visited the latter's aunt, Mrs. Myrtle Ady, last weekend

Miss Betty Duncan entertained a few school chums Saturday, being the occasion of her 12th birthday.

Mr. W. G. Liesemer and daughter Evelyn of Calgary were renewing acquaintances in town on Tuesday.

Mr. J. T. B. Boulton who has been at Vancouver for some time, is visiting with his son, Mr. J. Boulton, east of town.

Mr. and Mrs. Dunbar of Dauphin spent last week visiting Mr. and Mrs. Russell Ady. Mrs. Dunbar is a niece of Mrs. Ady's.

Mr. and Mrs. Wm. MacFarquhar left on Sunday by auto for Banff National Park where they will spend a two week vacation

Take advantage of Berscht's mid-summer Sale which ends next Saturday.

Miss Grace Ranton is spending her vacation visiting friends in Edmonton and attending the Exhibition.

Jerry Bird of the Royal Bank and Bob Barrett who have joined the Airforce, left on Thursday for the Brandon Manning Pool

Mr. and Mrs. Kelvin Shannon returned Sunday from their honeymoon which was spent at Bassano and Strathmore.

Dr. and Mrs. H. J. Schnaid and son John of Seattle, Washington, visited with the former's sister, Mrs. W. J. Schiedt and family last week.

Pte. Frank Carleton of the Trade School, Edmonton, was home over the weekend on four day leave before going East.

Mr. and Mrs. Chester Hale of Edmonton visited with Mr. and Mrs. E. G. Ranton last weekend. They were enroute to Vancouver on a vacation trip.

L.A.C. Jack Morton is now at the Yorkton, Sask., service flying school where is training with fighter planes while L.A.C. Clarence Cunningham is at Saskatoon training with the bomber section.

The singing cowboy, Gene Autrey in "Back in the Saddle" stars with Smiley Burnette and Mary Lee in a thrill-a-minute song-packed range hit which brings to our local Theatre this week action, comedy and music in the true Autrey manner.

Watch for Earl Spencer's Sale—Six head horses, 12 milk cows, 18 young heifers and steers.

Mrs. Ben Pengilly, of Mayburt, announces the engagement of her third daughter, Ruth Virginia, to Mr. Edwin E. Buhr, of Wilson Siding, eldest son of Mr. and Mrs. E. Buhr, of Didsbury, the wedding to take place in July.

Mrs. J. D. Sutherland of Dauphin, Man., is visiting with her daughter, Mrs. Russell Ady for a short time. On leaving here she will go to Vancouver where she will visit another daughter. Mrs. Sutherland is 78 years old and is travelling alone.

Men's and boys' running shoes—regular prices 90c to \$1.25. Special Saturday price 75c at Scott's.

Burnside Notes

Mrs. A. Jenkins left Monday to visit with friends at Nanton.

Mr. Bill Hughes of High River spent a week at his homelhere.

Mr. Reinhart Fritz spent Monday with relatives here

Mrs. Fred Thompson, Mr. and Mrs. Allie Thompson and son Donald and the former's grandson, Teddy Weal of Calgary, left Monday morning on a 19 day trip to Cranbrook

Among those who attended the Stampede were Fred Metz, Mrs. Dowell, Ray and Evelyn Dowell, and Barbara, Jean, Jimmy and Yvonne Miller

Miss Una Jenkins of Three Hills is spending her holidays at her home here.

Mr. and Mrs. Lyons and Mr. and Mrs. Walter McCulloch and Jessie were Sunday visitors with Fred Metz and Mrs. Dowell.

Mr. Fred Fritz spent the weekend with his wife and family who have been visiting her father, Mr. Hugh McLean for 10 days.

Mrs. T. Jenkin and small son Allen of Calgary, are visiting Mr. and Mrs. Enoch Hughes

The Didsbury Constituency convention of the U.F.A. and U.F.W.A. will be held in the Lone Pine Hall on Tuesday, July 22. Ladies please bring lunch for an old fashioned picnic dinner. In the afternoon Mr. Norman Priestley will address the gathering and Mr. Fowler of the Canadian Co-op. will tell how the Sask. farmers run their machinery co op. A good program is planned for the day so come and enjoy yourself.

The July meeting of the Lone Pine W.I. was held at the home of Mrs. B. Woods on Thursday last. Mrs. Fred Fritz won the 10c draw and Mrs. Stanley Coyne the War Saving Certificate. Mrs. Eckel gave a splendid paper on "Education and Better Schools" and Olwen Hughes won the bean guessing contest.

CARD OF THANKS

To all the many friends who so kindly gave their assistance and their sympathy during our recent bereavement we wish give our sincere thanks. We also wish to express our appreciation for the many floral tributes.

H. J. Friesen and family.

We wish to express our gratitude to our many neighbors and friends for their kindness and expressions of sympathy during our bereavement

Allen Hunsperger and family.

SHADE FOR LIVESTOCK

Now that the hot summer days are here owners of livestock should see to it that shade is provided. This is especially necessary for white hogs, which are susceptible to blistering. If during the hot part of the day a natural shade is not available, stock may be allowed in the barns or sheds. A cheap shed made of poles set in the ground supported a straw roof is very effective and costs little.

A little care in this matter will be repaid by more rapid gains in swine and higher milk production in dairy cows.

CLASSIFIED ADS.

For Sale—A quantity of good poles at 1c per foot Harold Oke.

Fox Meat Horses Wanted Apply Ed. Watkins, at Builders' Hardware
